

# 20th KM FEST - International Festival of Knowledge

Slovenia, Celje 18.-19.10.2021

This year KM FEST is addressing the "*Value Creation Networks 4.0*". It is designed for professionals, users, and other interested parties from the manufacturing industry, R&D, and industry supporting organizations with professional or business interests in using collaborative robots - digitalized enabling technologies, new business models, and the emerging competencies of Industry 4.0.

The first day is reserved for presentations of new technologies, technological scenarios, and practical application examples.

The second day is dedicated to demonstrations of practical examples of good practice in innovation ecosystems and the development of new competencies of Industry 4.0.

This is a hybrid event. The first KM FEST day will be the combination of classic physical and virtual presentations and discussions. The entire second day will be in virtual form only.

## KM FEST'21 Co-organizers

Competence Center ROBOFLEX Celje

Partners of the Collaborative Technology Platform ROBOTool 4.0

Partners of the international virtual living laboratory LENS Living Lab

You are kindly invited - there is no registration fee!
